

## Your Technology Solution

### Overview

Biztec provides a full suite of Managed 'IT' Services to companies large and small. The company was created on the idea that small businesses require the same quality solutions as large enterprises on a smaller scale. The main problem that these smaller organizations have in obtaining that level of 'IT' service is finding the right partner at the right price.

At Biztec our mission is to create a synergetic merger of Business & Technology that will create stronger and more profitable businesses. We also endeavor to provide trustworthy and knowledgeable support for individuals.

In all we do we will strive to put the needs of our customers first to create a secure, functional, efficient and affordable 'IT' Solution.

## Business Partners

## Verkada

Biztec has taken its deep background in cyber security, and applied that experience to physical security. With Biztec, you get a team with decades of experience designing physical security systems for Local Government, Law Enforcement, Manufacturing, Real Estate, and other industries.

We have a proven track record of success building large, distributed surveillance and security systems for our customers. Additionally, Biztec has partnered with Industry Leaders like Verkada, to stay on the cutting edge of site security.

## Testimonials

*"Best repair service I have ever used. They are prompt and caring and do a great job at a good price and just a great staff."*

- **Dominick**

*"As a business owner I am thankful we have such a fantastic tech service in our area. Our computer went down and Biztec came to the rescue! They fixed the computer quickly and now everything is back in order, with some much needed upgrades."*

- **Lori**
