

Managed IT

REMAIN PROACTIVE

- **Lack of proactive IT monitoring, maintenance, and support** can lead to increased system downtime, which directly impacts productivity and revenue. According to a study by IHS, **IT downtime costs businesses an average of \$1.55 million per year.**
- **MSPs can help reduce IT costs** significantly. A report by Nucleus Research found that **for every dollar invested in MSP services**, companies realized an average return of \$4.33.
- MSPs provide proactive monitoring and maintenance, leading to reduced downtime. A study by Forrester Consulting found that **MSPs reduced unplanned downtime by 86%.**
- MSPs offer scalability to align IT resources with business needs. According to a Deloitte survey, **53% of organizations used MSPs** to access skills or expertise they lacked internally.

Cyber Security

REDUCE RISKS

Cyber security threats are ever-present, and without the specialized knowledge and resources of an MSP, companies may be more susceptible to data breaches, ransomware attacks, or other security incidents.

According to IBM's Cost of a Data Breach Report, the **average cost of a data breach in 2020 was \$3.86 million.**
